

ParametersManager

```
classDiagram
    class ParametersManager
    class Config
    ParametersManager --> "1" Config
```

A UML class diagram showing a directed association between two classes. The top class is 'ParametersManager', represented by a light blue rectangle. The bottom class is 'Config', represented by a white rectangle. A solid black arrow points from the bottom of 'ParametersManager' to the top of 'Config'. To the right of the arrow, near the 'Config' class, is the number '1', indicating the multiplicity of the 'Config' class in this association.

Config
