

proc\_control::ControlModelF

```
classDiagram
    class proc_control__PositionMode["proc_control::PositionMode"]
    class proc_control__ControlModelF["proc_control::ControlModelF"]
    proc_control__PositionMode --|> proc_control__ControlModelF
```

The diagram illustrates a class hierarchy. At the bottom is a gray-shaded box labeled 'proc\_control::PositionMode'. A blue arrow points vertically upwards from this box to a white box at the top labeled 'proc\_control::ControlModelF'. This indicates that 'proc\_control::PositionMode' inherits from 'proc\_control::ControlModelF'.
